ARE YOUR RADIO COMMUNICATIONS SECURE ENOUGH?

- Secure communications means improved officer safety and efficiency

- Use encryption to prevent unauthorized monitoring of your communications

- Keep your fleet secure and manage your assets well with a Tait P25 Key Management Facility

- Ensure interoperability with non-proprietary encryption algorithms

- FIPS-approved AES encryption offers the highest level of security

Encryption mismanagement could leave you more vulnerable than having no encryption at all

Find out how to increase the security of your radio communications by downloading our white paper - **Managing Encryption: A guide for Public Safety decision makers**

EASE YOUR ENCRYPTION BURDEN
WITH A TAIT P25 KEY MANAGEMENT FACILITY

tait
communications

- **Easy to use and customizable:** As the only P25 KMF with a custom Dashboard, this Over-the-air Rekeying (OTAR) tool enables each crypto officer to set up, sort and see the keys, groups, radios, and tasks they are interested in.

- **Makes the complex simple:** Reminders helpfully prompt when keys may need changing, while Key Update Tasks can be scheduled and deployed without the crypto officer being present. Status bars show how current keys and update tasks are, and color coding and visual displays make decision-making clear and simple.

- **Helps save money:** A complete set of diagnostics across all devices allows crypto officers to troubleshoot and resolve problems remotely, saving technician time and money by avoiding visits altogether.

- **Comprehensive:** Have confidence that all radios are accessible with Tait's key transfer capability. Commission new radios or update radios that are not reachable by the OTAR system by transferring keys from the Tait P25 KMF to a Tait P25 Key Fill Device (KFD).

Tait P25 Key Management Facility

The Tait P25 Key Management Facility (KMF) is a flexible, powerful tool for any agency seeking to confidently and efficiently manage its P25 encryption across their entire fleet.

Only the easy-to-use Tait P25 KMF has a custom Dashboard enabling each crypto officer to see information the way they need to. Different teams' keys can be updated at a time to suit their operational profile. The Tait P25 KMF can update groups of radios over the air, at the press of a button. Other manufacturers' P25 radios can also be managed conveniently, while remote diagnostics save technicians' time.
