CUSTOMIZATION

RADIO COMMUNICATIONS TAILORED TO YOUR NEEDS

When you invest in radio communications, there's a lot at stake. It's your organization's efficiency and resulting profitability, your customers' convenience and the safety of your workers.

Choosing Tait as your network provider means that every aspect of your radio network can be tailored specifically to your industry needs. Tait can customize to meet your organizational preferences and your operational processes, irrespective of geographical challenges and the regulatory approvals governing your region or industry. Maintaining legacy equipment is your decision too, not your supplier's.

From custom firmware in your radio fleet, to a complex multi-vendor customized and integrated system, your needs can be met with a Tait solution that is simpler to implement, easier to use and guarantees the right fit for your organization.

WHAT DOES CUSTOMIZATION INVOLVE?

Capturing your requirements

Understanding your unique business and organization objectives and critical performance parameters is the first step. Tait engineers will spend time with stakeholders within your organization to understand the opportunities, challenges and needs of your communications strategy, before accurately and comprehensively defining your requirements.

Designing your solution

From agreed requirements, a multi-disciplined team of customization experts will develop a suite of appropriate, innovative design options. These will be presented to you with advantages and limitations clearly defined, for discussion and further development until agreement is reached.

Delivering your solution

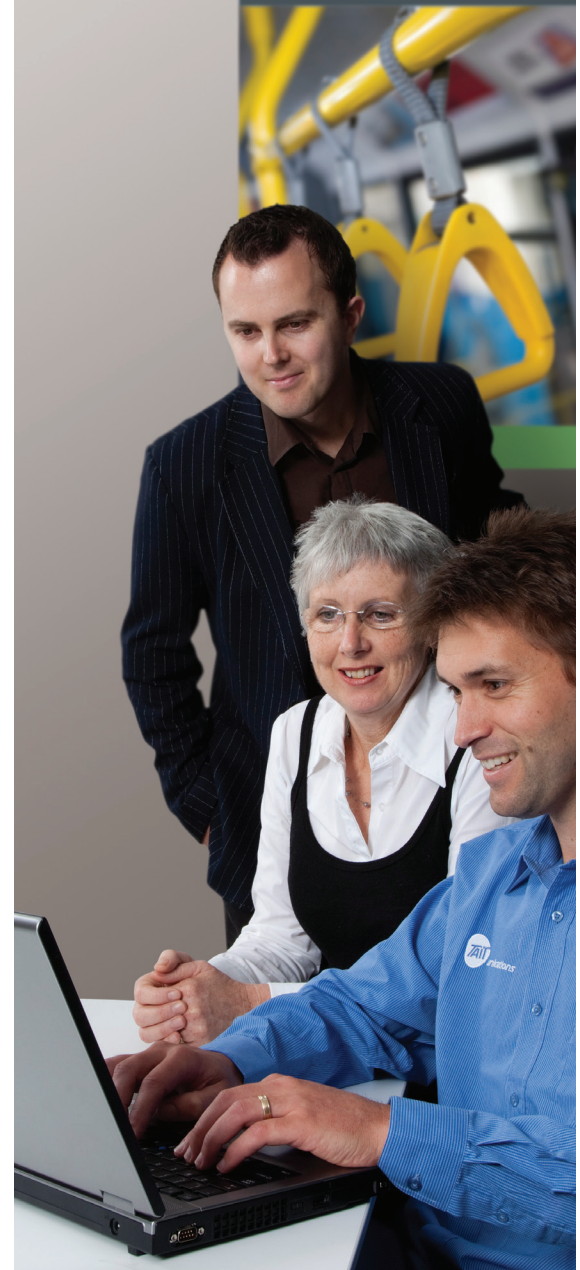

As the design becomes reality, you will be involved and informed throughout the process, able to test and comment on development at key stages. Your project is managed by the experienced Tait team to ensure it stays on track.

Guaranteeing compliance and quality

Every development is tested against parameters specified and agreed in the functional requirements. These may include standards that relate to radio operation or legislative requirements, locally or globally, and the operational requirements and KPIs of your organization.

RADIO AND RTCP SOLUTIONS FOR PUBLIC TRANSPORT

Visit booth 1250 to discuss your radio and RTCP needs and to enter the draw to win exciting daily prizes*

WHAT DOES CUSTOMIZATION DELIVER?

Experience that counts

Hardware, software, mechanical or technical information design, whatever the requirement, you can be confident in Tait experience and expertise. Your customized solution will be designed and delivered by a specialist, multi-disciplined team with decades of experience in customizing solutions for system operators like you.

Your solution, your timeframe

Your customized radio solution will be designed and delivered to meet your communication needs, not just functionally, but just as importantly, to your timeframe. Whatever your requirements now and in the future, Tait has the flexibility to guarantee the right fit.

Tangible, measurable benefits

Whether upgrading your legacy equipment with efficient new features and functions, progressively introducing new technologies or maintaining your established work processes across a new system, customization can add measurable performance efficiencies that positively impact your profitability.

The features you need

A customized solution ensures you can purchase precisely what you need. By incorporating those features and functions that have an identifiable benefit to your new or existing equipment, your solution guarantees the right fit for your business environment.

A lasting relationship

Project delivery is the beginning of a new phase. Tait continues to work alongside you as new operational challenges are presented and new technological opportunities arise. Tait is committed to meeting the challenge, fulfilling your technical requirements into the future.

Tait offers a range of radio communications services in three portfolios:

DESIGN

Technologies, tools and ideas to predict, plan, identify and customize a communications solution that guarantees the right fit. Tait Design services include:

- Customization,
- System Design,
- Network Migration Planning.

DEPLOY

The expertise to integrate and upgrade your radio solution, achieving seamless, streamlined and trouble-free implementation. Tait Deploy services include:

- Project Management,
- Technical Training,
- System Documentation.

SUPPORT

Continued, ongoing assurance and expert support for your equipment – and your people – for the life of your network. Tait Support services include:

- Health Check,
- Extended Product Warranty,
- Support Agreement.
