## NETWORK MIGRATION

### WHICH TECHNOLOGY FOR THE FUTURE OF YOUR ORGANIZATION?

When internal business drivers or external regulation commit your organization to upgrade your communications, can you ensure regulatory compliance and service continuity throughout? Can you confidently assess the technologies, align budget constraints, meet critical timeframes and mitigate outage risk to maintain operations throughout the critical changeover process?

Tait Network Migration delivers expert planning, industry experience and deep radio communications knowledge to create confidence in your migration plan as you move to the benefits of the new digital technologies. As your trusted partner, Tait can negotiate with industry regulators and your chosen equipment manufacturers on your behalf.

Upgrading to any new technology with Tait guarantees a staged and seamless upgrade path and outage-free cutover.

### WHAT DOES NETWORK MIGRATION INVOLVE?

Network Migration is customized to align with your communications requirements, business processes and preferred technologies.

#### Requirements Capture and Analysis

A comprehensive basis to plan your technology, traffic, frequency, coverage timing and budgetary decisions, this ensures full understanding between your organization and Tait experts.

#### Network and site assessment

This assessment will verify the plan, look in more detail at the support required and include prediction for future expansion.

#### Technology assessment

Tait experts will guide you through the capabilities and compatibilities of each technology to make the right choice for your organization's future.

#### Regulatory liaison

Where compliances and regulation govern your operating environment, Tait has the experience to liaise between your organization and regulator bodies.

#### Planning

Migration deployment is designed and scheduled for your pace and your budget, emphasizing a shorter design phase, lower site-related cost and minimized outage risk.

#### Network migration

Implementing your network migration in stages gives your organization greater control over each stage of the transition.

### RADIO AND RTCP SOLUTIONS FOR PUBLIC TRANSPORT

Visit booth 1290 to discuss your radio and RTCP needs and to enter the draw to win exciting daily prizes!

## WHAT DOES NETWORK MIGRATION DELIVER?

### Reduced Capex and Opex

Leveraging your existing infrastructure, maximizing re-use and managing deployment for minimal downtime and service outage reduce capital and operational expenditure.

### Reduced complexity and risk

Understanding and working with your key performance measures, Tait industry experts can minimize the operational risk and complexity associated with change.

### Seamless migration pathway

Planned and managed end-to-end, Tait Network Migration delivers a smooth, seamless and outage-free cutover to your new network technology.

Tait offers a range of radio communications services in three portfolios:

### DESIGN

Technologies, tools and ideas to predict, plan, identify and customize a communications solution that guarantees the right fit. Tait Design services include

- Customization,
- System Design,
- Network Migration Planning.

### DEPLOY

The expertise to integrate and upgrade your radio solution, achieving seamless, streamlined and trouble-free implementation. Tait Deploy services include:

- Project Management,
- Technical Training,
- System Documentation.

### SUPPORT

Continued, ongoing assurance and expert support for your equipment – and your people – for the life of your network. Tait Support services include:

- Health Check,
- Extended Product Warranty,
- Support Agreement.
