

Flexible, reliable and user friendly.

The TM8105 provides ultimate flexibility for system integration. With an expansive internal options area, this data radio is one of the most customizable mobile radios available.

KEY FEATURES

- ▶ Flexible communications
- ▶ 100 conventional channels available via CCDI (Computer Controlled Data Interface)
- ▶ Data capable - supports 1200/2400 baud FFSK data as standard
- ▶ Type 99 (2-tone) decode
- ▶ Internal high speed data modem (12 kbps on NB channels/19.2 kbps on WB channels) (software option)
- ▶ Four RF power levels
- ▶ Full Selcall functionality
- ▶ DTMF encoder
- ▶ Low standby power consumption (<80mA)
- ▶ MDC 1200 encode (software option)
- ▶ Emergency mode, stun and revive
- ▶ Advanced system integration capabilities
- ▶ Multiple auxiliary ports
- ▶ Programmable inputs/outputs and audio tap points
- ▶ Third party control head capable
- ▶ Direct connect GPS
- ▶ Optional third party developers kit

FEATURES AND BENEFITS

Engineered to be tough

The TM8105 exceeds stringent reliability specifications, including MIL-STD 810 C, D, E, F and IP54.

Software feature upgrades

The Software Feature Enabler (SFE) allows system operators to upgrade with additional functionality at any stage by simply purchasing the appropriate software license key.

Improved data integrity

The application of Digital Signal Processor (DSP) technology optimizes RF performance and ensures fast and reliable data processing.

Ease of integration

The system integrator has maximum design flexibility with multiple ports for auxiliary connectors and a large options board area. The comprehensive third party developer's kit provides integrators with hardware and software tools to facilitate customization.

AVI support

The TM8105 supports a standard polling vehicle location format and a direct connect port for an external GPS receiver, allowing for the development of a complete AVL solution.
