PROJECT AND PROGRAM MANAGEMENT

ON TIME AND WITHIN BUDGET – DO YOU HAVE THE RESOURCE?

The challenge of managing your radio communications investment through to deployment can be significant if it falls outside your core business focus. There may be unfamiliar technologies and specialized management activities that demand resource that is simply unavailable.

Irrespective of size or complexity, successfully upgrading or implementing a new radio system calls for detailed knowledge of communications hardware, software and information technologies. These are specialist skills that demand genuine insight, from liaising with your preferred third-party equipment providers or systems integrators, to identifying and managing risks.

Through every phase of your project lifecycle, Tait Project and Program Management experts can reduce project-related risk and support your organization to full system deployment. From initiation to post-deployment business-as-usual, qualified and experienced project specialists can help you accomplish shorter time to implementation and a higher return on your investment.

WHAT DOES PROJECT AND PROGRAM MANAGEMENT INVOLVE?

Strategy and Selection

Tait assists you to clarify communication goals and formulate a vision of strategic success. Identifying technologies, capabilities and strategic relationships creates an understanding of how a Tait radio solution can achieve it.

Initiation

Your high level schedule, deliverables and acceptance criteria establish the team, governance framework and management plan, aligning responsibilities with the scope of work.

Organization and Communication

Aligning with your organizational structure and staff capabilities, this stage specifies task ownership. It establishes the framework for remote and on-site engagement through a single, committed point of contact.

Planning and Scheduling

This stage provides the milestones and detailed work breakdown structure, aligning project resources to specific tasks to ensure your confidence over the timing of activities and deliverables.

Monitoring, Control and Deployment

Monitoring progress against plan, your internal and external stakeholder expectations are continually aligned. Tait experience gives you confidence that deployment issues are appropriately managed and mitigated to seamlessly deploy your radio solution.

Closure and Handover

Bringing your projects to closure, the Tait team ensures your organization now operates in a business-as-usual manner.

WHAT DOES PROJECT AND PROGRAM MANAGEMENT DELIVER?

Project-critical risks managed

For public safety, utility or transport communications projects, issues and risks can threaten project timing, quality and budget. Tait project team experts have the experience to anticipate, identify and mitigate the risks, leading to successful project deployment.

Cost-effective pathway to agreed objectives

Your organization has invested in Tait equipment because you require performance, dependability and certainty. Tait Project and Program Management can enhance your investment, using professionally-recognized standards and processes to achieve the most direct and cost-effective pathway to your agreed goals and objectives.

Aligned goals and targets

When your project depends on the relationship with your trusted partner, you can depend on Tait. Between your people and ours, all your deliverables, goals and timelines are clearly communicated and aligned within Tait to achieve successful, on-time outcomes.

Tait offers a range of radio communications services in three portfolios:

DESIGN

Technologies, tools and ideas to predict, plan, identify and customize a communications solution that guarantees the right fit. Tait Design services include:

- Customization,
- System Design,
- Network Migration Planning.

DEPLOY

The expertise to integrate and upgrade your radio solution, achieving seamless, streamlined and trouble-free implementation. Tait Deploy services include:

- Project Management,
- Technical Training,
- System Documentation.

SUPPORT

Continued, ongoing assurance and expert support for your equipment – and your people – for the life of your network. Tait Support services include:

- Health Check,
- Extended Product Warranty,
- Support Agreement.
