Great value, easily personalized radio
DMR TIER 2 & ANALOG
GREAT VALUE
The TP3 is packed with features, including voice annunciation, a color display, vibration alert, personalized label customization, and much more. With an array of options to suit different budgets and requirements, TP3 offers maximum flexibility and high quality in a lower cost portable.

IP67 Dust/Waterproof
The TP3 is rated IP67 for dust and waterproof protection, making it capable of withstanding immersion in water up to 1m for up to 30 minutes.

Advanced worker safety
Increase the safety of your workforce with GPS, Man Down, Bluetooth, and Vibration Alert options, available on the TP3350. Dual slot direct mode and transmit interrupt improve channel efficiency and allow faster response in emergency call situations. Voice and data encryption is also available.

DMR Tier 2 and Analog
TP3 offers options for every pocket, with models supporting both Analog and DMR Tier 2.

Colored covers
A wide range of color options lets you assign colors to certain groups, enabling quick team and user identification. Colors can also be used for brand identity.

Keypad variants and color displays
The TP3 can be quickly and cost-effectively upgraded with a simple cover change. A no-key, no-display unit can instantly be enhanced with increased functionality by changing the cover to a 4 or 16-key, color display.

Customizable labeling
The TP3 provides dedicated space for die-cut labels. Labels can be completely customized, offering a high level of personalization for any need.
PERSONALIZE YOUR TP3

The TP3 features recesses for custom designed labels, providing dedicated space to personalize your radio. Labels are die-cut to fit, and can be completely customized with anything imaginable. Tait offers a design service, or templates are available for you to personalize with your name, organization’s logo, asset ID, bar code, call sign – the possibilities are endless.

Label stock

When printed on the Epson TM-C3500 printer, the labels are BS5606 approved (GHS) and meet the following standards:

- Chemical Resistant
- Abrasion Resistant
- Temperature Resistant
- Waterproof
- UV Resistant
- Tear Resistant

Recommended printer

Labels die-cut for the TP3 are specifically designed for the Epson TM-C3500. This is a high-quality ink jet printer that uses pigment-based inks and produces smudge and liquid-resistant printed labels. Tait recommends using this printer for all TP3 labels.

For more information, visit taitradio.com/tp3 or contact an authorized Tait dealer near you.

Applying labels to your TP3 is easy:

1. Ensure the radio surface is clean.
2. Print your required labels.
3. Carefully peel and apply labels to recesses.
4. Hold firmly for a few moments to assist adhesive.
