Unified Push-to-Talk over Cellular Solution for anyone, at anytime, anywhere.

Enhance and future-proof Land Mobile Radio (LMR) systems with integrated Push-to-Talk over broadband Cellular integration (PTToC).

Tait TeamPTT provides operational and administrative staff with enhanced access to instant communication and information.

Tait TeamPTT does this through integration of Push-to-Talk over cellular, WiFi and Tait LMR systems. It provides a choice of end-user devices that are familiar and are aligned to the user's job.

Tait TeamPTT is available on either Android, iOS, or PC App and provides Push-to-Talk for anyone, at anytime, anywhere.

Tait TeamPTT enhances:

- **Coverage** – the ability to communicate when beyond the edges of LMR coverage or when in coverage black-spots, such as in-buildings, car-parks, or tunnels where cellular or WiFi signals are present.
- **Capacity** – the ability to add extra capacity to your LMR system as your organization grows, as work-groups are expanded or as agencies’ communication systems are consolidated.
- **Expand Users** – provide ability to participate in group communications to non-radio users
- **Discreet Communications** – Covert users including undercover detectives, investigators can communicate using a standard smartphone allowing them to more easily blend into their surroundings.
- **Awareness** – the ability for administrative staff to maintain incident awareness wherever they are located or for staff on call-back to develop awareness of the incident as they return to duty.
Features:
- Instant Secure PTT Group and Individual Voice and Text
- AES-256 Voice & Data Encryption
- Easy to use Contact and Group Selection
- Wireless Carrier Independent and Cross Carrier Capable, 3G/4G LTE and WiFi
- Fast Call Setup and High Voice Quality
- In-Call Preemption and Priority based call override
- Live and Historical (Bread Crumb) Location Tracking
- Complete user account management via web administration tool
- Cloud Hosted or On-Premise Servers
- High Availability Regional Servers
- Instant Ad Hoc Group Calling
- PC Based Client

Integration with LMR Systems:
- Voice integration using 4-wire E&M network gateways (MPT, DMR or P25 Systems)
- ISSI integration with P25 Phase 1 or 2, both with Encryption Capability
- AIS integration with DMR Tier 3 networks

Capacity:
- Maximum Contact List Size: 895 Users
- Broadcast Group: 60,000
- Maximum Group Size: 250
- Group types: Member, Open, Closed and Dispatch
- Surveillance and Unicast Radio Channels

Usage:
Tait TeamPTT offers cost-effective, professional grade communications and location tracking for teams of any size, with no hardware outlay. Increase the geographical range of communication quickly and cheaply, by connecting DMR, P25, or conventional radio networks to LTE devices.

Tait TeamPTT is ideal for:
- Rural fire teams – integrate radio channels into team communication
- City-based cycle couriers – combine with Bluetooth™ accessories, messaging apps, and PC based apps, to stay in touch while on the move
- Factories – centralize communications and reach team members with ease
- Electricity suppliers – take advantage of secure and managed communications over the P25 network, but using familiar devices
- ...and much more!

Data services disclaimer: Tait TeamPTT uses enterprise-grade data services provided by commercial cellular and WiFi infrastructure, consequentially end to end call performance can be dependent on the quality of the data services provided.
