

Secure, dependable, and flexible.

With FIPS validated encryption, certified interoperability, digital audio clarity and superb build quality, the TP9155/60 are tough, dependable and sophisticated portable radios.

The TP9155/60 gives you the flexibility of working in digital, analog or auto sensing dual modes.

KEY FEATURES

- ▶ Tested in a Department of Homeland Security-recognized P25 Compliance Assessment Program (P25 CAP) laboratory for interoperability and performance
- ▶ Radios can be used on analog, P25 conventional, trunked and simulcast networks
- ▶ A Non Incendive option for use in Class I Division 2 hazardous locations is available
- ▶ FIPS 140-2 certified encryption
- ▶ Tested beyond MIL-STD-810 C, D, E and F – Tait performs tougher drop tests, then performs ingress and other tests on the same radio
- ▶ Configurable emergency features - Man Down and Lone Worker as standard
- ▶ A range of analog signaling features - MDC1200 encode/decode* and Two Tone decode with the purchase of software licenses**
- ▶ Comprehensive scanning features including P25 talk group
- ▶ User interface is common with the Tait P25 mobiles for ease of use

*MDC1200 decode includes calling identity display and inhibit/uninhibit functionality.

**Software license option(s) available separately

FEATURES AND BENEFITS

Encryption for secure communications

AES encryption certified by the US National Institute of Standards and Technology (NIST) or proven DES encryption can be incorporated into the TP9155/TP9160 for highly secure communications.

These radios can be encrypted fast in-field with the Tait Key Fill Device (KFD) or via Over-the-air Rekeying (OTAR) with the Tait Key Management Facility (KMF).

Tait Tough Radio

Reliable and durable TP9135/TP9140 portable radios have been built to withstand the accidental knocks and the extremes of nature.

Dual shot molding provides built-in shock absorption, while a unique and patented battery clasp mechanism eliminates threat of the battery dislodging when the radio is dropped.

Interoperability assured

The TP9155/TP9160 portable radios are tested on other vendors' networks as part of the P25 Compliance Assessment Program (P25 CAP).

This offers Public Safety and Government agencies a multi-vendor environment.

Digital audio clarity

Crystal clear digital audio allows precise communications even in noisy environments.

Analog operation for phased transition

Protect your current analog investment and migrate to P25 digital at your own pace.

Analog mode allows communication between various partner agencies.

Configure to suit with software licenses

Software licenses allow a solution that is readily extended as needs change, removing the risk of hardware upgrades and factory returns.

Trunking, P25 CAI, encryption, location transmission/display*, Application Programming Interfaces (APIs) and OTAR are just some of the software license options available.

Comprehensive accessory suite

Complement your public safety radio with high performance accessories and charging options that will allow frontline staff to spend more time on patrol.

Being a manufacturer of digital and analog radios, base stations and network equipment means Tait has the solution focus to serve you better.

Tait's P25 portables, mobiles and the hand-held control head all share the same intuitive interface.

GENERAL

Frequency ranges	Frequency band
VHF	136–174MHz
	380–420MHz
UHF	400–470MHz
